

Try searching for all of these!

Himonya Park is a valuable local green space that is home to many animals, and also attracts animals from outside of Meguro City.

In this area, in order to create various environments where animals can live, we grow plants that will be eaten by animals.

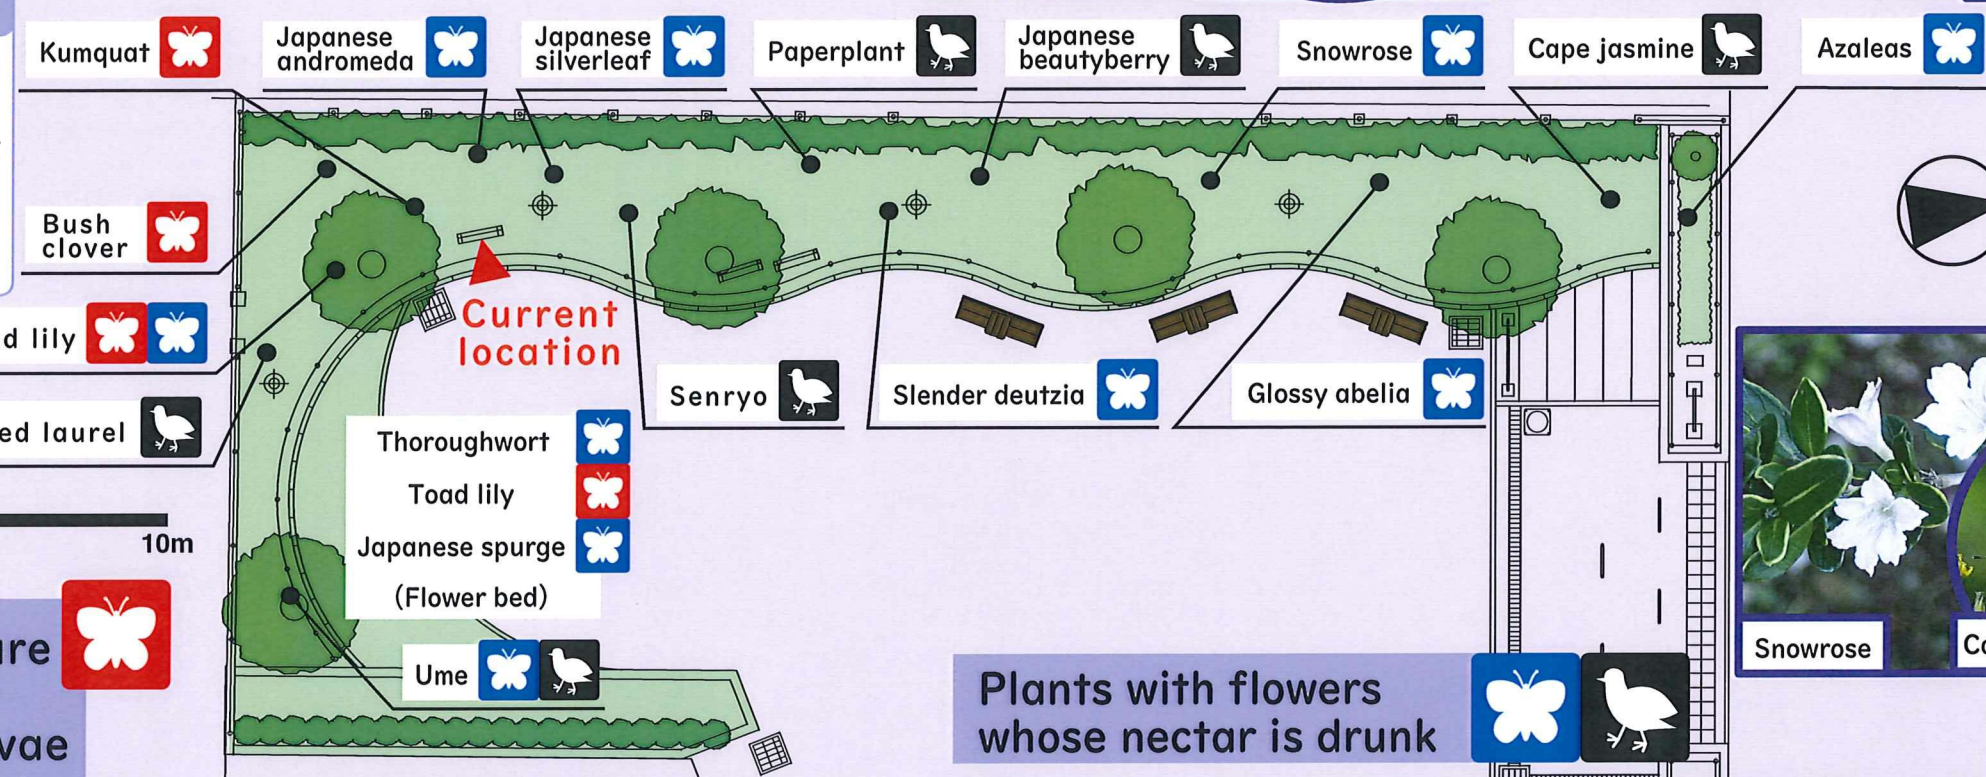

Butterflies and wild birds might show up in search of nectar or fruit!

Plants that bear fruits that are eaten

[Legend]

- Plants that are eaten by butterfly larvae
- Plants with nectar that butterflies drink
- Plants that attract wild birds

Plants that are eaten by butterfly larvae

Plants with flowers whose nectar is drunk
